AUTO*
SANITIZER POD™

Auto Sanitizer Pod™

The Auto Sanitizer Pod™ is designed to lower the spread of infectious pathogens such as tuberculosis and coronavirus. It can be installed at high human traffic areas such quarantine centers, hospitals, supermarkets, office buildings, airports, railway and bus stations, to name a few.

This modular sanitizing gateway is easily transported and installed. The main components are movement sensors, multiple mist spraying nozzles and water-based disinfectant. The sensors in the pod automatically trigger the spraying process once a person passed through the gateway. The person is advised to stay in the pod for about 6 seconds to allow the disinfection process to complete.

With its 10-liter tank capacity, one unit of the Auto Sanitizer Pod™ can sanitize up to 600 visitors before the next refill.

Technical Descriptions

Model:	Auto Sanitizer Pod™
Dimensions:	1200mm x 700mm x 2100mm (W x D x H)
Weight:	95kg
Power:	30W/12V/50Hz
Pump Pressure:	3 Bar
Structure:	2.5mm Fiberglass-Reinforced Plastics
Trigger Mode:	Movement Sensing
Tank Capacity:	10 liters
