

ASEPT.2X

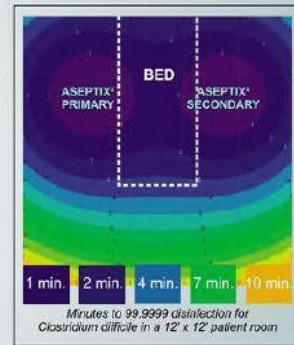

MOBILE UV DISINFECTION SYSTEM

Dimensions (per unit): 65" x 28" x 28"
Power (per unit): 120V, 15 Amp.

UVC germicidal energy is effective at penetrating the cellular membrane of the microorganism causing irreparable damage to the DNA resulting in the sterilization of the microorganism.

Conventional mobile / room UV disinfection systems are effective but require multiple positioning within a room to lessen the chances of "shadow area" that block the sterilizing ability of the UVC light. In doing so, time and resources are spent moving the system around the room and in some cases preparing the room for additional treatments.

The Sanuvox ASEPT.2X Mobile UV Disinfection System disinfect the room in under 10 minutes.

Disinfect high-touch areas that may contribute to HAIs

Irradiate patient rooms, bathroom and ORs

No need to reposition while disinfecting entire room
